TORUS

KEY MANAGEMENT FOR THE MODERN ENTERPRISE

COMPLETE CONTROL AT YOUR FINGERTIPS

Torus is a cloud-native access control solution for keys. It's easy to use and scale across multiple sites - allowing you to manage your organization's keys, cards and tags with ease.

Stop wasting time handing out keys, searching for lost keys, or re-keying your sites. With Torus, you can have complete key control at your fingertips and ensure only authorized personnel can access their keys.

With comprehensive reporting and real-time notifications, Torus allows you to manage your sites from anywhere in the world.

Harnessing the power and security of cloud-native technology, Torus will elevate the efficiency, security and safety of any workplace.

MANAGE YOUR SITES REMOTELY

Torus gives you complete control of your organization's keys... from anywhere in the world.

Cabinets can be easily deployed without needing to install software or invest in IT infrastructure and personnel. Built using Microsoft Azure, Torus eliminates the cost and resources required to maintain servers, local databases & applications, as well as the endless cycle of updates and patches.

With a range of native integrations, Torus also allows you to manage your keys and personnel from one central platform.
