

## Integrated visitor management & key control

Torus + Rapid Global makes it easy for contractors and visitors to access the keys they need. This integrated solution provides secure and automated key management as part of your check-in and check-out process.

### Security

Keys are secured when not in use and can only be accessed by authorized users

### Efficiency

Reduce time and frustration associated with manually checking keys in and out

### Accuracy

Maintain consistent details across systems without additional data entry

### Remote Management

Manage your sites remotely, freeing up time and resources for more complex tasks

The Challenge	The Solution	The Savings
Scattered keys and access cards	\$14k per site (plus \$1.2k per year)	\$80k per year
Unnecessary travel time	Slashed travel time	\$50k a year in reduced labour costs (2.5 hours per day, 6 days a week)
Inability to track missing keys	Boosted job satisfaction	
No way of controlling who is given what keys	Manage key access for staff and contractors remotely	\$30k a year through avoiding a key and lock replacements
Significant security risk due to many lost keys	Improved security through real-time visibility and accountability	

### Advantages

Deploy seamlessly across all your sites without the need for servers or IT infrastructure – just an internet connection. This solution allows for pre-defined and on demand allocation of keys. With Torus and Rapid Global, you can manage contractors and visitors remotely, freeing up time and resources.

### Requirements

- Torus cabinet
- Torus software account with integrations
- Active Rapid Global account with valid license
