

## Integrated key management & access control

Torus + LenelS2 makes it easy for staff and contractors to access the keys they need. This integrated solution means only authorized personnel have access to keys - you can control access to each key and know exactly who has them.

### Manage

Administrator creates new cardholder and assigns permissions in OnGuard.

### Audits

Comprehensive reporting is available. All transactions are automatically recorded

### Authenticate

Cardholder presents credential to the reader mounted on the cabinet

### Notifications

Customizable notifications are sent. E.g. if keys are overdue

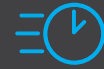

### Access

Only the required keys will be accessible. All others remain locked in place

### Security

Keys are secured when not in use and can only be accessed by authorized users

### Efficiency

Reduce time and frustration associated with manually checking keys in and out

### Accuracy

Maintain consistent details across systems without additional data entry

### Unified Reporting

Enjoy comprehensive reporting and a single source of truth

## Advantages

Deploy seamlessly across all your sites allowing for comprehensive management of cardholders, buildings and keys. Update permissions in real time and view all reporting on user activity and alarms from within Lenel OnGuard.

## Requirements

- Torus cabinet
- Torus software account + integrations
- Compatibility with v8.0+
- Open Access API
- OnGuard License Entry IPC-031-CICT01-B
