

4 MONTH ROI

MONASH HEALTH SAVES 3,664 HOURS PER YEAR WITH **SIEMENS** AN INTEGRATED KEY MANAGEMENT SYSTEM

Monash Health is Victoria's largest public health service. For more than 170 years, Monash Health and its predecessors have provided safe, high-quality healthcare for people at every life stage.

The facilities management team at Monash Health struggled to manage keys effectively. Despite using a competitor key management system, facility managers would manually handle hundreds of keys using outdated key cabinets, which lacked any access control and integration with Siemens SiPass. As a result, the staff, security guards, and contractors had unfettered access to keys.

The lack of a robust workflow to monitor, audit, and control access to keys presented constant security risks. To address these issues, Monash Health needed an access control for keys that seamlessly integrated with Siemens SiPass, providing a single source of truth for user credentials and real-time reporting on critical events and 'key' transactions.

Monash Health selected Torus and started with 4 Torus cabinets. Torus ensure keys are always readily available to authorised users whenever needed and securely stored when not in use. The elegant Torus + SiPass integration provides facility and security managers with a single platform, making it easy to manage access permissions for staff, guards, and contractors. With an integrated platform, they can effectively monitor keys and ensure only authorised personnel can access them – and only when required. Most importantly, they always know who the last 'user' was, which is important when keys or equipment are damaged or lost. Now that their key access is automated, Monash Health saves an enormous amount of time and money every year.

THE CHALLENGE	THE SOLUTION	THE SAVINGS
INEFFICIENT KEY MANAGEMENT SYSTEM	\$95K UPFRONT (Plus \$5k per year)	3,664 HOURS PER YEAR
<ul style="list-style-type: none"> ✗ Lacked integration with Siemens SiPass ✗ Uncontrolled key access ✗ Lack of accountability ✗ Safety and security risks ✗ Wasted time and resources 	<ul style="list-style-type: none"> + 4 X Torus cabinets + Enterprise grade solution + Reliable integration with Siemens SiPass. + Management of key access from SiPass + Eliminated unauthorised access 	<ul style="list-style-type: none"> ✓ ROI = 4 months ✓ \$6,500 saved on replacing locks and keys ✓ \$376K per year labor efficiency gain across staff and contractors

Torus + SiPass integrated key management system has transformed the way we manage key access. What was once a manual, time-consuming, and high-risk process is now fully automated, secure, and seamlessly controlled. Our facility and security teams have complete visibility over key usage, and it has significantly reduced security risks, improved accountability, and saved us countless hours.
