HOW NOVO NORDISK IS FUTURE PROOFING OPERATIONS

Honeywell

 **PAVION**
CONNECT AND PROTECT

Novo Nordisk is a global healthcare company with more than 90 years of innovation and leadership in discovering and developing treatment for serious chronic diseases.

The operations team at Novo Nordisk production facility faced challenges with a legacy key management solution. The key cabinets operated in silos and lacked seamless and reliable integration with Honeywell ProWatch. With information spread across disparate systems, it was difficult to analyze data and pull reports, which posed a risk of misinformation. Lack of real-time data and integration between critical systems resulted in inefficient administration and inaccurate personnel management within the organization.

It also presented security concerns for this high security site. Security personnel spent hours trying to make sense of data from various systems. Novo Nordisk needed a modern, scalable key management solution that is easy to use and flexible to support the evolving needs of the organization.

They turned to Pavion and Torus, to deliver an enterprise grade solution with seamless Honeywell Prowatch integration. 9 Torus key cabinets are installed. Torus + Honeywell ProWatch provide an integrated solution to manage keys. It has eliminated on-site servers, IT overheads, and SQL Server license costs. It simplifies data management, allowing for comprehensive reporting on 'key transactions and related events within Prowatch. Torus is delivering easy to use but powerful control over keys and assets, whilst also providing the highest levels of security for company data – the security that only a cloud native solution provides. Built for scalability, Torus will adapt and grow with Novo Nordisk's evolving needs - providing a future-proof solution with no hidden costs.

THE CHALLENGE	THE SOLUTION	THE SAVINGS
HUNDREDS OF KEYS	\$135K UPFRONT	\$30K EVERY YEAR ON IT OVERHEADS
<ul style="list-style-type: none"> × Legacy key management system × Standalone × Multiple disparate systems × Inefficient administration × Inaccurate personnel management × Not scalable 	<ul style="list-style-type: none"> + 9 Torus cabinets configured and installed. + Seamless Honeywell Prowatch integration + Improved operational efficiency + Modern and scalable solution + Increased productivity 	<ul style="list-style-type: none"> ✓ Savings on IT overheads including server, MSQl, labor and software updates ✓ Significant efficiency gains from streamlining access control to keys for all staff and contractors

Switching to Torus for our key management has been a game-changer. With seamless integration into Honeywell ProWatch, we now have a centralized, real-time solution – that delivers greater visibility, enhanced security, and complete peace of mind. We know our key management is efficient, reliable, and built for the future."
