WAVERLEY COUNCIL SAVES 7,133 HOURS EVERY YEAR WITH AN INTEGRATED ACCESS CONTROL SOLUTION FOR KEYS

Waverley Council is a local government area in the eastern suburbs of Sydney, Australia. It provides various services, programs, and initiatives to improve the quality of life for the Waverley community.

The facilities team at Waverley Council was seeking a modern, cloud-native key management solution that provides flexibility, remote management, and can evolve with their future needs. It was critical that the key management system be seamlessly integrated with Inner Range access control. With hundreds of staff and contractors accessing keys daily, the council required a single platform to manage and monitor key transactions across all locations.

It was critical that Integriti be the 'single source of truth' for user credentials, eliminating the need for Waverley to manage users and monitor alarms and events across disparate systems.

The council and their security integrator, ECS selected. To date 8 Torus cabinets have been installed across 7 sites. A single Torus software account is integrated with Integriti Innerrange and has delivered Waverley, a unified platform to secure keys when they aren't used and provide controlled access to authorized staff and contractors. The integration with Integriti makes it easy for administrators to manage staff and contractors' permission to access keys – via Integriti.

Torus eliminated the burden on staff managing keys and time wasted to receive and return keys. They now have real time visibility over who has what keys and when. Now that their key management is automated, Waverley is saving an enormous amount of staff and contractors time every year.

THE CHALLENGE	THE SOLUTION	THE SAVINGS
HUNDREDS OF KEYS TO MANAGE	\$13K PER SITE	7,133 HOURS PER YEAR ACROSS 7 SITES
<ul style="list-style-type: none"> × Remote key management × Modern and flexible solution × Seamless Integriti integration × Planning for future needs of the council × Wasted time and resources 	<ul style="list-style-type: none"> + 8 X Torus cabinets configured and installed. + Managing keys across 7 sites from a single platform (Integriti) + Complete accountability + Remote key management + Real-time monitoring and visibility 	<ul style="list-style-type: none"> ✓ ROI = 3 months ✓ 1,019 hours per year per site ✓ Eliminated wasted time spent searching for keys or waiting for keys ✓ Reduced cost of replacing lost keys ✓ Reduced labor costs

Torus + Integriti have transformed key management at so many sites for the council. It saves staff hours each day and enhances the quality of work by automating the entire key management process.
