CBRE   JLL   ventia   ISPT SUPER PROPERTY   woodside

Security
Keys are secured when not in use and can only be accessed by authorized users

Efficiency
Reduce time and frustration associated with manually checking keys in and out

Accuracy
Maintain consistent details across systems without additional data entry

Remote Management
Manage your sites remotely, freeing up time and resources for more complex tasks

The Challenge	The Solution	The Savings
>1000 key sets to manage	$460k upfront + $30k per year	$1.5m per year incl. labor used for other tasks
No effective key management system	39 Torus cabinets integrated with Sine	~$1.3m in labour and contractor fees
Wasted time for staff and contractors	Relief for site managers	Labour can be allocated to higher value tasks
Poor security of keys	Win back wasted staff and contractor time	~$0.2m in eliminated key and lock replacement costs
	Security and peace of mind	

Advantages
Deploy seamlessly across all your sites without the need for servers or IT infrastructure – just an internet connection.
This solution allows for pre-defined and on demand allocation of keys.
With Torus and Sine, you can manage contractors and visitors remotely, freeing up time and resources.

Requirements
Torus cabinet
Torus software account with integrations
Active Sine account with valid license
