HOW THE SAFETY AUTHORITY BECAME FUTURE PROOF WITH AN INTEGRATED KEY MANAGEMENT SOLUTION

GALLAGHER
Security

A prominent Australian Government Safety Authority had plans to move to new office premises in 2023/24. To provide a flexible, hybrid working environment, the authority decided to move all business applications to a secure, cloud hosted environment.

Like all enterprises, they wanted a modern, scalable access control solution for keys that is easy to use, and flexible to support the future needs of the department. Seamless integration with Gallagher Command Centre was mandatory.

The requirement was for the Command Centre to be the source of truth for user credentials and that reporting upon key events and transactions be supported via the Command Centre.

Torus was selected to provide this solution. The elegant Torus + Gallagher Security integration makes it easy for administrators to manage staff and contractors' permission to access the keys they need – via Command Centre.

Torus enables reporting on key transactions and associated events to be performed in the Command Centre. Torus is providing the authority with a future-proof solution, that will evolve with their requirements for years to come. And there are no hidden costs.

THE CHALLENGE	THE SOLUTION	THE SAVINGS
HUNDREDS OF KEYS	**$53K UPFRONT**	**2,648 HOURS PER YEAR**
✕ Remote key management ✕ Modern and scalable solution ✕ Planning for future needs of the department	+ Three Torus cabinets configured and installed. + Comprehensive dashboard and reporting + Remote management + Real-time accountability + Increased productivity	✓ ROI = 4 months ✓ $158K a year in reduced labour costs ✓ $5K a year saved on replacing locks and keys

> " Torus offers the perfect blend of modernity, flexibility and scalability that we needed for our new office. It adapts effortlessly to our evolving needs, allowing us to stay agile in a fast-paced market.
