

KEY MANAGEMENT FOR THE MODERN ENTERPRISE

COMPLETE CONTROL AT YOUR FINGERTIPS

Torus is a cloud-native access control solution for keys. It's easy to use and scale across multiple sites - allowing you to manage your organisation's keys, cards and tags with ease.

Stop wasting time handing out keys, searching for lost keys, or re-keying your sites. With Torus, you can have complete key control at your fingertips and ensure only authorised personnel can access their keys.

With comprehensive reporting and real-time notifications, Torus allows you to manage your sites from anywhere in the world.

Harnessing the power and security of cloud-native technology, Torus will elevate the efficiency, security and safety of any workplace.

More Information

Manufacturer

Torus is designed and manufactured by CIC Technology Pty Ltd, an ISO 27001 & 9001 certified organisation.

Data Security

Torus software inherits Microsoft Azure's multi-layered security, deployed across physical data centers, infrastructure and operations. It is supported by the largest team of cybersecurity experts in the world.

Certifications

Tier 4
ISO/IEC 27001
ISO/IEC 27018

CSA
SOC 1
SOC 2

PCI
DSS
HIPAA

Certified Security
Best practice encryption and identity management, including multi-factor authentication

Return on investment
Eliminate labour costs, contractor fees and the price of changing locks

Easy to use
Torus cabinets and software are easy to use resulting in smooth adoption

SMS and email alerts
Resolve security risks faster and keep the right people informed

Quick to install
No software to install, no local servers required. DHCP, PoE and 4G included

Solution for the future
With over-the-air updates, Torus keeps evolving - a smart long term investment

Remote key control
Make fast, informed decisions and control your keys from anywhere in the world

Unlimited Scalability
Perfect for organisations with multiple locations, nationally or internationally

MANAGE YOUR SITES REMOTELY

Torus gives you complete control of your organisation's keys... from anywhere in the world.

Cabinets can be easily deployed without needing to install software or invest in IT infrastructure and personnel. Built using Microsoft Azure, Torus eliminates the cost and resources required to maintain servers, local databases & applications, as well as the endless cycle of updates and patches.

With a range of native integrations, Torus also allows you to manage your keys and personnel from one central platform.
