

MONASH HEALTH SAVES 3,664 HOURS PER YEAR WITH AN INTEGRATED KEY MANAGEMENT SYSTEM

Monash Health is Victoria's largest public health service. For more than 170 years, Monash Health and its predecessors have provided safe, high-quality healthcare for people at every life stage.

The facilities management struggled to manage keys effectively. Despite using a competitor key management system, they would manually handle hundreds of keys using outdated key cabinets, which lacked integration capabilities. As a result, the staff, security guards, and contractors had unfettered access to keys.

The lack of a robust workflow to monitor, audit, and control access to keys presented constant security risks. To address these issues, Monash Health needed a system that seamlessly integrated with Siemens SiPass, providing a single source of truth for user credentials and real-time reporting on critical events and 'key' transactions.

Monash Health selected Torus and started with 4 Torus cabinets. Torus ensures keys are always readily available to authorized users and secured when not in use. The elegant Torus + SiPass integration provides facility and security managers with a single platform, making it easy to manage access permissions for staff, guards, and contractors. With this integrated platform, only authorized personnel can access keys, and only when required. Most importantly, they always know who the last user was, which is important when keys or equipment are damaged or lost. Now that their key access is automated, Monash Health saves an enormous amount of time and money every year.

THE CHALLENGE	THE SOLUTION	THE SAVINGS
INEFFICIENT KEY MANAGEMENT SYSTEM	\$95K UPFRONT (Plus \$5k per year)	3,664 HOURS PER YEAR
× No integration with SiPass × Uncontrolled key access × Lack of accountability × Safety and security risks × Wasted time and resources	+ 4 X Torus cabinets + Enterprise grade solution + Reliable integration with SiPass. + Management of key access from SiPass + Eliminated unauthorized access	✓ ROI = 4 months ✓ \$6,500 saved on replacing locks and keys ✓ \$376K per year labor efficiency gain across staff and contractors

Torus + SiPass integrated key management system has transformed the way we manage key access. What was once a manual, time-consuming, and high-risk process is now fully automated, secure, and seamlessly controlled. Our facility and security teams have complete visibility over key usage, and it has significantly reduced security risks, improved accountability, and saved us countless hours.
