TORUS | Access Control for Keys

KNOW WHO HAS EVERY KEY AT EVERY SITE

Torus is a cloud-native access control solution for keys. It's easy to use and scale across multiple sites.

Stop wasting time handing out keys, searching for lost keys or re-keying your sites. With Torus, you can have complete control at your fingertips and ensure only authorized personnel can access keys.

Commercial Real Estate | Data Centers | Education | Government | Gaming | Healthcare | Hospitality | Utilities

A complete audit trail
See who took which key, when it left and when it came back.

Avoid re-keying
Cut locksmith callouts and the cost of changing locks.

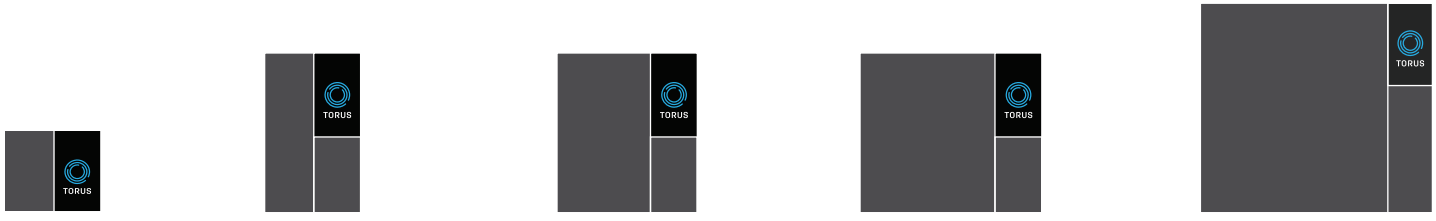

Certified Security
SHA256 encryption at rest and in transit. Identity integration and MFA.

Easy to use
Intutive cabinets and software mean fast, smooth adoption across your teams.

Quick to install
No software to install and no local servers, DHCP, PoE and 4G included.

SMS and email alerts
Receive key overdue alerts and keep the right people informed.

Your Cabinet Options
Five Sizes. One Platform

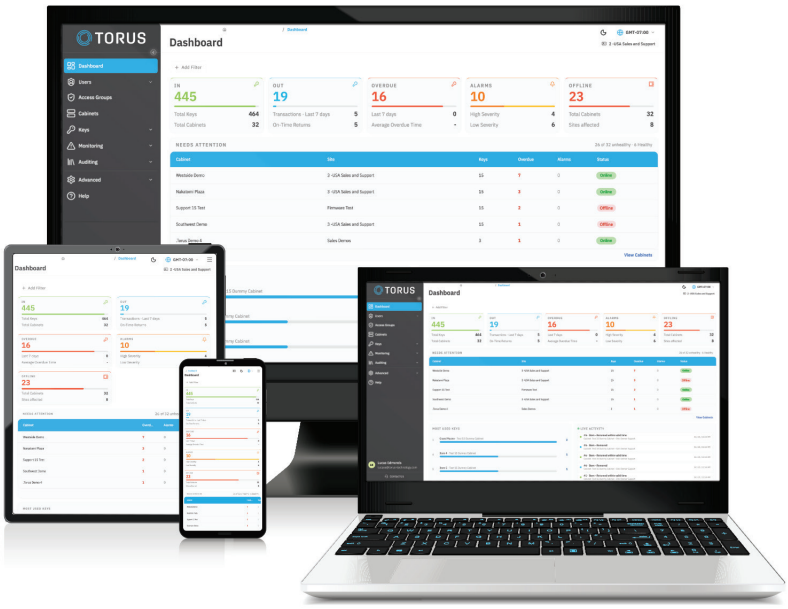

5 SETS OF KEYS

15 SETS OF KEYS

25 SETS OF KEYS

50 SETS OF KEYS

100 SETS OF KEYS

COMPLETE CONTROL OF YOUR KEYS

Built on Microsoft Azure, Torus removes the cost of servers, local databases and applications, and the endless cycle of updates and patches.

Cabinets deploy without new IT infrastructure and native integrations let you manage keys and people from your existing access control platform.

NOTHING TO INSTALL | RUNS IN CHROME, EDGE AND SAFARI

Everything you need to take control of your keys

Built for the future
Over-the-air updates keep Torus evolving, making it a smart long-term investment.

Multiple sites, one dashboard
Manage keys across campuses, regions and countries.

Remote key control
Make fast, informed decisions and control your keys from anywhere.

Unlimited scalability
One site or hundreds, across a region, a country or the world.
